It is not necessary for interested parties to contact the PTO to request to attend the briefing.

SUPPLEMENTARY INFORMATION: The United States is committed to making progress in the World Intellectual Property Organization (WIPO) toward improving international protection for works protected by copyright and neighboring rights. We want to build upon the international intellectual property norms that were set in the Agreement on Trade-Related Aspects of Intellectual Property (TRIPs). This is essential, especially in view of the need to deal with the intellectual property issues associated with the Global Information Infrastructure (GII). To accomplish this goal, the members of WIPO, with the leadership of the United States, are working to establish three new international agreements, commonly referred to as--

A Protocol to the Berne Convention for the Protection of Literary and Artistic Works, which would modernize the Berne Convention to take into account new forms of expression and new uses of copyrighted works that have evolved due to technological developments since the Berne Convention's most recent revision in 1971.

A New Instrument for the Protection of Performers and Producers of Phonograms, which would improve international standards of protection for sound recordings, and protect the rights of certain performers in respect of their live performances.

A Treaty for the Sui Generis Protection of Databases, which would ensure adequate incentives to invest in creating databases, through a new type of protection that would safeguard databases against destruction of their commercial value.

These agreements would provide the levels of protection for both copyright and neighboring rights that are critical to the development of the commercial potential of the GII.

Much progress has been made in the negotiations in WIPO through the submission of treaty proposals by the United States and other countries. Based on these submissions and the views expressed in meetings of the Committee of Experts, the Chairman of the Committee of Experts has prepared three draft treaties which address digital and conventional copyright issues. These proposed treaties will be taken up at a Diplomatic Conference on Certain Copyright and Neighboring Rights Issues to be convened December 2-20, in Geneva at WIPO headquarters.

As the Administration prepares for the Diplomatic Conference, we invite interested parties to submit written comments on the Chairman's text of the draft treaties. These comments should be received by the PTO no later than November 22, 1996.

In addition, to facilitate a better understanding of the text of the draft treaties, the PTO will hold a briefing to discuss them. During the briefing, Jukka Liedes, Chairman of the Committee of Experts, will discuss the text and will be available to answer questions.

Copies of the draft treaties and other information relevant to the Diplomatic Conference can be found at the PTO's home page, located at www.uspto.gov. Copies of the draft treaties will also be available at the briefing and upon request.

[Docket No. 960828232-6294-02]

RIN 0651-AA90

Establishment of Recordal Fees Associated with the Fastener Quality Act

AGENCY: Patent and Trademark Office, Commerce

ACTION: Final Rule.

SUMMARY: The Patent and Trademark Office (PTO) is amending the rules of practice to establish fees associated with recordation of insignia of manufacturers and private label distributors to ensure the traceability of a fastener to its manufacturer or private label distributor. This amendment is in accordance with the provisions of the Fastener Quality Act. 15 U.S.C. 5401 et seq.

EFFECTIVE DATE: November 25, 1996.

FOR FURTHER INFORMATION CONTACT: Lizbeth Kulick by telephone at (703) 308-8900, or by fax at (703) 308-7220, or by mail marked to her attention and addressed to the Assistant Commissioner for Trademarks, 2900 Crystal Drive, Arlington, Virginia, 22202-3513.

SUPPLEMENTARY INFORMATION: On August 17, 1992, the Department of Commerce issued a notice of proposed rulemaking to implement the Fastener Quality Act (Act). 57 FR 37032. In that notice, the PTO was identified as the Office within the Commerce Department with the responsibility for recording the fastener insignia of manufacturers and private label distributors as required by Section 8 of the Act. 57 FR 37033-35, August 17, 1992. The notice proposed that the costs of recording insignia be recovered by user fees. 57 FR 37035-36, August 17, 1992.

The PTO must publish a notice in the Federal Register of any change of its fees at least 30 days before the effective date thereof. 15 U.S.C. 1113(a). On September 17, 1996, a notice of proposed rulemaking was published in the Federal Register, at 61 FR 48872-73, to announce three proposed fees of twenty dollars each, to recover costs associated with the insignia recordal program. The PTO has received no comments regarding the proposed fees.

Additionally, the September 17th notice proposed to remove two rules from Part 2, 37 C.F.R. 2.53 and 2.189, because they were deemed not administratively necessary. Section 2.53 specifies the manner in which drawings must be transmitted. Section 2.189 simply states the Office's policy on publishing amendments to the rules. This policy is not changing, but will no longer be stated as a rule. No comments were received on the proposed removal of the two rules.

OTHER CONSIDERATIONS

This rule is not significant for the purposes of Executive Order 12866. The Office of Management and Budget approved the information collections required by this rule on October 1, 1996 (OMB number 0651-0028). This clearance expires October 31, 1999. The affected public is manufacturers and private label distributors of certain types of industrial fasteners. The estimated average number of responses is six hundred. The estimated time per response is ten minutes, so the estimated total annual burden is one hundred hours. The collected information is needed to ensure that a fastener can be traced to its manufacturer or private label distributor.

Notwithstanding any other provision of law, no person is required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number.

Refereace Collectioas of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. Notice of Examination For Registration Wednesday, August 27, 1997

Pursuant to the provisions of 37 CFR §§ 10.5, 10.6 and 10.7, an examination for persons seeking registration before the U.S. Patent and Trademark Office as patent attorneys and agents

will be held on **Wednesday, August 27, 1997.** This date has been chosen to accommodate, wherever possible, the interests of the individuals expected to apply for the examination. The deadline for filing applications along with the **$40.00 nonrefundable fee and the $300.00** examination fee and all necessary showings required by 37 CFR § 10.7(a) and (b) is **May 2, 1997**.

With the exception of those persons who actively served four years or more in the patent examining corps of the U.S. Patent and Trademark Office for whom the examination may be waived, all persons who wish to become recognized to practice before the U.S. Patent and Trademark Office in patent cases must, pursuant to the above noted rules, pass the examination. Note that passing the examination does not qualify one for recognition for practice before the U.S. Patent and Trademark Office in trademark cases. Such recognition is governed by 37 CFR § 10.14 which does not require the passing of an examination.

Application forms may be obtained from the Office of Enrollment and Discipline, Crystal Park One, Room 518, 2011 Crystal Drive, Arlington, Va., by mail addressed to U.S. Patent and Trademark Office, Box OED, Washington, D.C. 20231, or by calling (703) 308-5316-x-18.

Treatment of Correspondence Deposited as First Class Mail Pursuant to 37 CFR 1.8 and Returned by the U.S. Postal Service

Due to heightened security concerns, effective September 1, 1996, the United States Postal Service (USPS) is requiring that all *domestic first-class mail, bearing stamps and weighing sixteen ounces, or more*, be presented to a retail clerk at a USPS office. All such mail that is not presented to a retail clerk at a USPS office (*e.g.*, placed in a mailbox) will be returned by the USPS. The USPS has posted notice of this requirement on mailboxes. The "Express Mail" service of the USPS is not affected.

37 CFR 1.8 provides that certain correspondence will be considered timely filed by the Patent and Trademark Office (PTO) if, among other things, it is deposited with the USPS by the due date, and includes a certificate of mailing that sets forth the date the person signing the certificate reasonably expected the correspondence to be mailed. Correspondence must be deposited with the USPS as first class mail in compliance with any and all applicable requirements of the USPS to be considered "[d]eposited with the U.S. Postal service" within the meaning of 37 CFR 1.8(a)(1)(i)(A). Correspondence presented to the USPS in a manner that does not comply with the applicable requirements of the USPS is not "[d]eposited with the U.S. Postal service" within the meaning of 37 CFR 1.8(a)(1)(i)(A) and is not entitled to any benefit under 37 CFR 1.8.

To alleviate hardships caused by this change in USPS requirements, the PTO will treat correspondence returned by the USPS because of its size as "[d]eposited with the U.S. Postal service" within the meaning of 37 CFR 1.8(a)(1)(i)(A), so long as the correspondence was otherwise originally deposited with the USPS in compliance with 37 CFR 1.8(a)(1)(i) on or before December 1, 1996. Returned mailed that is either resubmitted to the USPS for delivery, or hand-delivered to the PTO, will be stamped by the PTO with the actual date of receipt in the PTO. The correspondence will, however, be accorded the benefit of any certificate of mailing under 37 CFR 1.8.

Correspondence mailed after December 1, 1996, and returned by the USPS as not mailed in compliance with USPS requirements concerning mail weighing sixteen ounces or more will not be entitled to any benefit under 37 CFR 1.8.

Because this change in USPS requirements does not affect the "Express Mail" service of the USPS, it does not affect correspondence filed in compliance with 37 CFR 1.10. Persons filing correspondence in a manner other than by the procedures set forth in 37 CFR 1.8 or 1.10 do so at their own risk.

Questions concerning this notice should be directed to Senior Legal Advisor Robert W. Bahr at (703) 305-9285.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information in various formats from the U.S. Patent and Trademark Office. Many PTDLs have on file all full-text patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs have both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office*. The full-text utility and design patents are distributed numerically on 16 mm microfilm, and plant patents on color microfiche. Patent and trademark search systems on CD-ROM (Compact Disc-Read Only) format are available at all PTDLs to increase utilization of and enhance access to the information found in patents and trademarks. It is through the CD-ROM systems that preliminary patent and trademark searches can be conducted through the numerically arranged collections.

All information is available for use by the public free of charge.

In addition, each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials. Facilities for making paper copies of patent and trademark information are generally provided for a fee.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

*A communication from the examiner should have been received in most applications filed prior to this date.

Patents will Expire as Follows:
(1) The term of any utility or plant patent that is in force on or results from an application filed before June 8, 1995 is the greater of the 20 year term provided in 35 U.S.C. 154(a)(2) or 17 years from grant subject to any terminal disclaimers. 35 U.S.C. 154(c)(1).
(2) All utility and plant patents granted on applications having an actual United States filing date on or after June 8, 1995 are granted for a term which begins on the date on which the patent is granted and ends 20 years from the date on which the application was filed in the United States. If the application contains a specific reference to an earlier application under 35 U.S.C. 120, 121 or 365(c), the patent term ends twenty years from that date on which the earliest application was filed. 35 U.S.C. 154(a)(2).
(3) All design patents are granted for a term of 14 years from the date of the grant.
However, the term of any patent may have been curtailed by disclaimer under the provisions of 35 U.S.C. 153, have lapsed due to failure to pay maintenance fees, or have been extended under the provisions of 35 U.S.C. 154, 155, or 156. Thus, if more reliable information is needed with respect to a particular patent, then the specific patent file should be reviewed to determine the actual date of patent expiration.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
